

## ABOUT US

IMPALA PHONES, is a Manufacturing company established in MUMBAI – INDIA, with a registered brand name IMPALA, in the early 1980s to develop and market Tele-Communication equipments, with in house R&D facility.

Since then, in order to be in-step with the changing demands, Impala Phones has gone on upgrading the system, with a pioneering zeal.

Impala Phones started with Manufacturing, Push Button Intercoms. When the Government of India opened license for private owned telephone exchange, Impala has deigned and developed, EPABX Systems, also this was the one & only company to have acquired the certificate of approval in MUMBAI from TEC (Telecommunication Engineering Center, Dept. of Telecom, Govt. of India.)

Foreseeing the need of Security, for the life and property of the members of housing societies, Impala Phones was the pioneer in introducing the Tele-Security society intercom system i.e. EPAX (Electronic Private Automatic Exchange) in Mumbai, way back in the early Nineteen nineties.

Our expansion and developments are focused in providing electronic security solutions and home automation systems. During our silver jubilee year we have introduced colour Video Intercom system for multi apartments, and colour video door phone systems.

Manufacturing and providing a single solution with built in intercom along with home automation systems is our goal.

Manufacturing quality products backed by efficient after sales service is our principle.

A product of IMPALA PHONES INDIA.
